— 2022 - 2023

Extensive experience in using **JavaScript, Vue.js, React, Next, PHP, Magento**

- **Motion** frontend development.
- **Infinix** full-stack development.
- **Markofly** full-stack development.
- **Ravensoft** full-stack development.
- **Intech** solutions of many banks.

### Temel Mühendislik

### Web Developer

— 2021 - 2022

Extensive experience in using **HTML, CSS, JavaScript, Node.JS**

- **Temel Mühendislik** company web site development, testing and deployment.
- **Temel Mühendislik** company web site maintenance and site updates.

### YBSoft Development Team

### Software Developer

— 2018 - 2020

Extensive experience in using **React, Python, MSSQL**

- Developed a hospital **web application and automation system**, utilizing React.js for the frontend, Python for the backend, and MSSQL for the database. This project involved designing and implementing user-friendly interfaces using React.js, handling business logic and data processing on the backend with Python, and managing data storage efficiently using MSSQL. Through this project, I demonstrated proficiency in full-stack web development and the ability to create robust solutions tailored to specific industry needs
